

NO BEDS IN BASEMENT

Residents in Public Housing Programming may NOT have beds set up in the basement. This includes the storage of mattresses with bedding attached, the placement of mattresses on the basement floor or frame, or any other perceived set up of a bed. Utilizing the basement as sleeping quarters is a violation of municipal code and HUD guidelines, and poses a severe health and safety risk. Further, if set up bedding is identified, it is a possible indication of an unauthorized resident.

I agree to comply with this requirement at all times while a participant in public housing programming:
